# **Executive Summary**

Since her appointment in late 2018, Professor Harvey-Smith has worked across the STEM sector to raise awareness and to remove barriers to the participation of women and girls in STEM.

She has communicated directly with more than 17,800 educators and young people, including visits to 46 schools across Australia. Her message about exciting future STEM careers for everyone have reached a combined 51.6 million Australians through media and social media.

In her first two-year term the Ambassador undertook 115 hours of public outreach and engagements across Australia, communicating with 35,150 people including students, teachers and educators, policymakers, STEM research organisations and industry representatives.

In 2020 the Ambassador's team launched the Future You Digital campaign, reaching a huge 2.3 million children, parents and carers. Throughout the campaign we had over 2.5 million completed video views driving 140,000 clicks to the Future You website.

We had 1.1 million video views across our partners Totally Awesome network. Overall, the Future You microsite had 142,232 unique page visits and the mini games were played over 2000 times.

Our pilot Evaluation Guide for Women in STEM programs launched in March 2020 and has been downloaded by over 290 people in Australia and internationally. International downloads include: New Zealand, Japan, U.S., U.K., Spain, Denmark, Africa, Japan and Canada.

Between May and July 2020, the Evaluation Guide was tested by 13 Women in STEM and Entrepreneurship rounds 1 and 2 grant recipients. 28 gender equity program providers gave feedback to inform the final version of the guide which launched in December 2020.

Professor Harvey-Smith speaking at the STEM Women database launch

Our Anonymised Review study has seen four large Australian research organisations and funding bodies take part in the national trial and we have already seen significant structural changes to their funding schemes.

As we rapidly transitioned to virtual engagement in 2020 we showcased many exciting, diverse careers in STEM while shining the light on gender equity in STEM. Events included a 3-part Astrophysics Live online program with Lisa Harvey-Smith which included star-gazing, Super STEM Careers Q&A for National Science Week where 90% of event participants agreed that listening to STEM professionals made them more interested about jobs in STEM fields, and STEM Story time (supported by Questacon) which had 3-6 year old's building their very own space helmet and questioning gender preconceptions about astronauts.

Media coverage of the Women in STEM
Ambassador was predominantly on radio, online
and TV, with mainstream media as the leading
source of coverage, including ABC, News Corp and
Nine Publishing. In 2020 our media activity totalled
1,536 media appearances or mentions reaching a
collective 51.6 million people and consistent 100%
favourability. The Office has grown its social media
following and reach to a potential audience of
2.7 million people.

4 Office of Women in STEM Ambassador Office of Women in STEM Ambassador

#### **Overview**

This annual review provides a summary of the activities and achievements of the Office of the Women in STEM Ambassador in the 2020 calendar year.

#### **About us**

The Office of the Women in STEM Ambassador is an Australian Government initiative to address gender equity in science, technology, engineering, and mathematics (STEM).

In October 2018, the Australian Government announced Professor Lisa Harvey-Smith as the Women in STEM Ambassador, a position outlined in the 2018-19 Budget as part of a \$4.5 million package to encourage more women into STEM education and careers.

In September 2020, The Hon Karen Andrews MP, Minister for Industry, Science and Technology announced the continuation of Professor Harvey-Smith's important work as the Australian Government's Women in STEM Ambassador for an additional two years. The Australian Government is providing \$3 million over 2018-19 to 2021-22 for the Women in STEM Ambassador initiative.

The Women in STEM Ambassador initiative is funded by a Commonwealth Grant and hosted at the University of New South Wales. We work with stakeholders across government, education and training, research and industry sectors to enhance the visibility of Women in STEM and drive needed cultural and social change for gender equity.

#### **Our Purpose**

Led by Professor Lisa Harvey-Smith, the Office promotes awareness of STEM careers to young people, parents and carers, and works with educators to challenge gender stereotypes and promote inclusive and engaging STEM education for all.

The Office works with stakeholders across government, education and training, research and industry sectors to drive cultural and systemic change to institutions and workplaces that remove structural barriers and enable the full participation of women and girls in STEM education and careers.

Photo credit John Carroll - UNSW Canberra

#### **Our Vision**

We are a leader in action for gender equity in STEM, encouraging and empowering girls to pursue STEM study and careers and advocating for systemic and cultural change across the sector.

The four pillars to drive achievement of our purpose are:

#### INCREASE VISIBILITY OF WOMEN IN STEM ROLE MODELS

The Women in STEM Ambassador is a visible role model with a consistent national profile, and raises the visibility of women in STEM role models.

#### STEM EDUCATION

Empowering girls and supporting their teachers and parents/carers to encourage girls' STEM interests.

#### ADVOCATE FOR GENDER EQUITY IN STEM

The Ambassador is recognised as an authoritative source of knowledge on gender equity in STEM and engages with stakeholders across the sector to promote action to address gender inequity.

#### **STEM CAREERS**

The Ambassador's activities attract women to STEM careers, and support the sector to address inequities that prevent organisations from retaining women in STEM fields.

The key audiences we engage with are educators, families, STEM workplaces and government decision makers. These pillars and audiences have been utilised in a matrix structure to underpin engagement.

6 Office of Women in STEM Ambassador Office of Women in STEM Ambassador

# YEARIN 2020 REVIEW 2020

#### **Our Activities**

The Office of the Women in STEM Ambassador aims to increase the participation of women in STEM studies and careers by engaging stakeholders across education, industry, state and federal governments and research.

Our work is aligned with the Australian Government's Advancing Women in STEM strategy and the Women in STEM Decadal Plan. Our activities raise awareness of gender equity issues, advocate for change and enhance the visibility of women in STEM.

We work at a national level to raise awareness of issues affecting women and girls' participation in STEM and drive cultural and systemic change to address barriers to gender equity. We achieve this by engaging with key stakeholders to support actions for women in STEM, raising awareness of opportunities available in STEM for women and girls, acting as a visible role model for students and influencing leaders and policy makers to promote decision making that supports improved gender equity in STEM.

The Ambassador's first term has focussed on building the public profile of the Ambassador and building relationships with the STEM community, engaging with teachers and other educators to communicate strategies to engage girls in STEM in the classroom, talking with parents and carers to encourage children's interest in STEM and providing advice to industry leaders and policymakers on women in STEM. To assess achievement of outcomes of our first term, we have used web and media analysis, internal content and activity tracking and engagement feedback.

The Ambassador undertook 115 hours of outreach and engagements across Australia, communicating with 35,150 people including students, teachers and educators, policymakers, STEM research organisations and industry representatives.

Notable activities included:

- Keynote addresses at the Women in STEM
   Decadal Plan symposium, the Catalysing Gender
   Equity in STEM conference and the launch of the
   STEM Women website.
- Delivering the keynote address at the inaugural Hopper Down Under conference in Australia
- Delivering a virtual keynote at the Girls Day Out in STEM 2020 to 798 young women
- Participating in Monash University's 'Let's Talk STEM' webinar, which was viewed by 7,200 educators

- Keynote at the NSW Regional STEM Education Conference 2019, to an audience of 600 teachers
- ASEAN Women in Innovation Leadership Dialogue panel speaker
- Presenting at the European Gender Summit in Amsterdam
- Publishing four articles on gender equity in STEM in *The Conversation*, including one co-authored with Chief Scientist Dr Alan Finkel
- Authoring forewords for publications for school students including the 2019–20 STEM Careers Guide, the Careers with STEM: Maths magazine and the 2020–21 STEM Careers Handbook

In response to demand for virtual education offerings during the pandemic our office transitioned our planned events for the year and engaged in virtual outreach with:

Professor Lisa Harvey-Smith speaking at the Pathways to Gender Equity in STEM Symposium.

Professor Harvey-Smith at SMAGS Astronomy Club

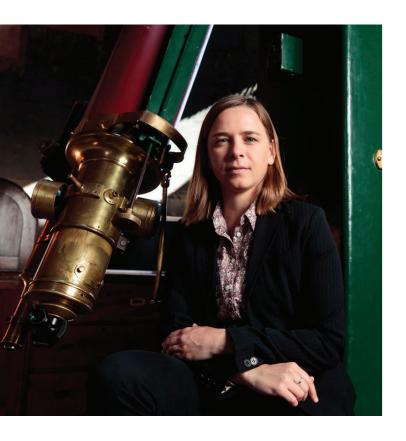

#### **#WISTEMxQ**

On 11 February 2020 (the International Day of Women and Girls in Science), we announced a partnership with Questacon encompassing two activities, one for educators and one for early learners and their parents/carers.

The events were redesigned to reach audiences the Ambassador would normally engage with in person. In May 2020 the #WISTEMxQ Women in STEM workshop for educators in partnership with Questacon was delivered online to 43 educators from across Australia. The workshop provided action-focused solutions and strategies to increase girls' participation in STEM and featured six speakers from Science and Technology Australia's Superstars of STEM program.

The second activity as part of the #WISTEMxQ partnership was published on 8 October 2020 for preschool aged children, called STEM Story time. The video aimed to challenge stereotypes about STEM careers through the main astronaut character, and the resources gave parents and carers information about gender stereotypes and bias in STEM and strategies to encourage children. The initiative was also delivered as a workshop by early education centres and libraries. The video received 430 views and the STEM story time webpage had 2,590 unique visits.

# Astrophysics Live with Lisa Harvey-Smith

A 3-part YouTube Live series for children was developed in response to physical distancing due to the pandemic and the rapid transition to online learning. Partnering with NSW Department of Education DART Connections to promote live interactive videos featuring astrophysics activities and Q&A for children, the three-part series totalled 677 bookings and 466 live viewers (363 people asking questions/interacting online), and 2,495 total views.

Astrophysics Live with Lisa Harvey-Smith

#### **Super STEM Careers**

The Office of the Women in STEM Ambassador delivered a live, interactive, virtual STEM careers Q&A for high school students for National Science Week. The event raised awareness of STEM career opportunities and profiled diverse women in STEM role models. The event was joined live by 129 attendees and as of January 2020, the YouTube video recording has received an additional 325 views. After the event, 90% of event participants agreed listening to STEM professionals made them more interested about jobs in STEM and 90% agreed they wanted to study STEM because they want to contribute to society. Speakers were Professor Lisa Harvey-Smith, Dr Kalinda Griffiths (epidemiologist, Yawuru women and Superstar of STEM) and Marita Cheng AM (engineer and tech entrepreneur, founder and CEO of Aubot, founder of Robogals).

#### **Future You**

Future You was launched in 2020, a new digital initiative to inspire girls to see their future selves in a range of jobs using STEM skills. The Future You online platform is aimed at children aged 8 to 12, as well as their parents and carers, and features 12 diverse and aspirational characters, including a builder, miner, game designer, farmer, nurse, ecologist and a Moon to Mars Mission Director. The campaign includes a website with video animations, skill-based games and information about STEM.

In 2020 the Ambassador's team launched the Future You Digital campaign, reaching a huge 2.3 million children, parents and carers. Throughout the campaign we had over 2.5 million completed video views driving 140,000 clicks to the Future You website.

We had 1.1 million video views across our partners Totally Awesome network. Overall, the Future You microsite had 142,232 unique page visits and the mini games were played over 2000 times.

Children who saw the campaign reported a significant lift in interest of STEM jobs and subjects with a shift from 74% to 92%. Future You has driven an increase in strong interest in STEM jobs and subjects among children – with strong interest among girls increasing three-fold. For parents, the campaign raised parents' opinion of the importance of STEM skills for their children's future job prospects, particularly shifting 'very important' for their children to have such skills.

Office of Women in STEM Ambassador
Office of Women in STEM Ambassador

#### **Research Projects**

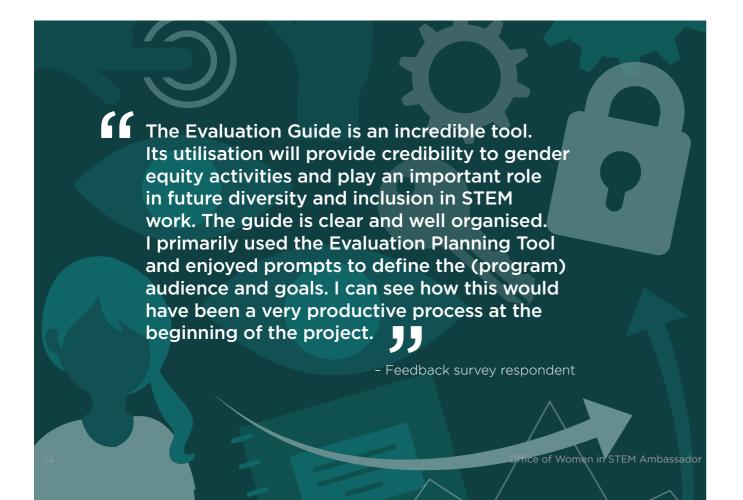

#### The Evaluation Guide

Our official website launched in May 2020, alongside the launch of the National Evaluation Guide. The 'Guide' enables program leaders to conduct meaningful program evaluations and share them with the broader community. Since publication in May 2020, the Guide has been downloaded by over 290 people in Australia and internationally. International downloads include: New Zealand, Japan, U.S., U.K., Spain, Denmark, Africa, Japan and Canada.

Between May and July 2020, the National Evaluation Guide was piloted by 13 Women in STEM and Entrepreneurship grant recipients. 28 gender equity program providers provided feedback to inform the final version of the guide. In December 2020, the final version of The Guide was published by the Office of the Women in STEM Ambassador and provides practical tools for anyone running a gender equity program to evaluate their project and focus on what really works.

Isabelle Kingsley launches The Evaluation Guide

Isabelle Kingsley, Research Associate

#### **Anonymised Review**

Isabelle Kingsley, Research Associate, designed a study of anonymised review in the application processes for allocation of research resources and engaged with key national research organisations to participate. The results will provide a strong evidence base to inform government and the STEM sector on equitable processes.

Four large Australian research organisations and funding bodies are taking part in the national study: CSIRO, Australia's Nuclear Science and Technology Organisation (ANSTO), National Computational Infrastructure (NCI), and Astronomy Australia Limited (AAL).

Since March 2020, the Office has worked closely with all four organisations to facilitate and make significant structural changes to their funding schemes. These four organisations made changes to their procedures, systems, and application portals in order to integrate and commit to implementing anonymous review practices.

The project is ongoing, with the aim to submit the study for academic publication in 2022. The study is a key action in the Australian Government's Advancing Women in STEM strategy and 2020 Action Plan.

Office of Women in STEM Ambassador

#### **Advisory Role**

We have been involved in providing feedback on several documents for consultation, and advice on actions and initiatives to reduce barriers to women's participation in STEM. In response to the impact of the COVID-19 pandemic on women in STEM, the Office provided advice and recommendations to The Hon Karen Andrews MP, Minister for Industry, Science and Technology and the Department of Industry, Science, Energy and Resources on ways to support women in STEM in COVID-19 economic recovery. Selected recommendations were carried forward by policy makers. The Office also contributed as co-authors of the Rapid Research Information Forum report on the impact of the COVID-19 pandemic on women in the STEM workforce.

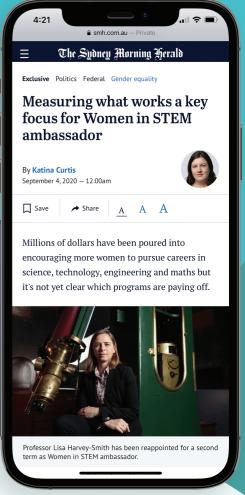

We also provided feedback on the guidelines for the 2020 WISE grant round to ensure projects focus on creating systemic change, and input into the design of the parents/carers and teachers Youth Insights survey. Additionally, we provided input into key projects for the STEM sector including the Women in STEM Decadal Plan, the Chief Scientist's STEM workforce report, the Australian Cybersecurity Strategy, and the National Skills Commission National Skills Priority List.

The Ambassador also provided advice to leaders and policy makers by attending meetings of the National Science and Technology Council, the National COVID Coordination Commission, The Federation of Australian Chief Scientists and the Women in STEM Advisory Council roundtable.

#### Media

Media coverage of the Women in STEM Ambassador was predominantly on radio, online and TV, with mainstream media as the leading source of coverage, including ABC, News Corp and Nine Publishing. In 2020 our media activity totalled 1,536 media appearances or mentions reaching a collective 51.6 million people and consistent 100% favourability.

The three key messages in media coverage over the Ambassador's first term included:

Science is interesting and fun

Build visibility and drive needed cultural and social change for gender equity in STEM

We need to build a gender-balanced workforce supported by an inclusive workplace culture that values diversity 1,536 MEDIA APPEARANCES

# 51.6M REACH

This media activity and broad engagement with key audiences and STEM stakeholders indicates that we are active in the community and strongly communicating key STEM gender equity messages in line with the position aims. The significance of the Women in STEM Ambassador initiative in supporting women in STEM was recognised by its inclusion as a case study in the 2020 Women's Economic Security Statement.

Office of Women in STEM Ambassador

#### **Social Media**

The Office has grown its social media following and reach to a potential audience of 2.8 million people. There was a 1-6% increase in followers after key events and announcements on social media, indicating support for the Ambassador role and continued interest in the Ambassador's activities following engagement with the Office.

Our social channels are an important avenue to communicate the work of the Office to our stakeholders in the STEM sector.

#### **Our People**

The team includes the Women in STEM
Ambassador, a Program Manager, Campaign
Coordinator, Project Officer, Research
Associate, Digital Content Officer, and Program
Support Officer. These roles equip the Office
with a diversity of expertise to enhance our
capability to conduct gender equity research,
communicate our messages to a broad
audience and allow us to expand our impact.

#### Who we work with

We have developed relationships with stakeholders across education, industry, research and government to:

- Identify and support existing gender equity activities
- Coordinate and collaborate on initiatives
- Communicate the case for change

A few of the key stakeholders we collaborated and communicated with in 2020 are listed below.

#### **GOVERNMENT**

NSW Department of Education, Forum of Australian Chief Scientists, NT Department of Education, AusIndustry, DIIS, Questacon, ANSTO, DFAT

#### **PEAK BODY**

Academy of Science, SAGE, Engineers Australia, Science and Technology Australia, MCC STEM, Academy of Technology and Engineering, Australian Science Teacher's Association, Universities Australia

#### **EDUCATION**

ANU, UTS, Monash and UNSW Engineering Faculties, educators

#### RESEARCH

ARC, NHMRC, Monash Education Futures, CSIRO, National Computation Infrastructure, Astronomy Australia Limited, ANSTO

#### **INTERNATIONAL**

NZ Ministry of Business, Innovation and Employment, UNESCO, Advance HE

#### **MEDIA**

Refraction media, ABC TV and radio

#### OTHER

Parents/carers, school students, Women STEM professionals

#### **Annual Budget**

The Women in STEM Ambassador initiative is funded through a Commonwealth Grant Agreement, which provides \$1.5 million in funding over two years.

The cost breakdown of the budget and expenditure as at December 2020 is shown below.

|   | TOTAL PROJECT BUDGET (\$) | 2020 EXPENDITURE (\$) |
|---|---------------------------|-----------------------|
| Labour costs  | 1,288,000                 | 607,000               |
| Direct costs  | 71,000                    | 53,000                |
| Contract expenditure  | 42,000                    | 9,000                 |
| Domestic and international travel                           | 71,000                    | 5,000                 |
| Staff training  | 3,400                     | 2,200                 |
| Audit costs   | 10,000                    | 10,000                |
| Reporting costs<br>(quarterly, annually and end of project) | 14,600                    | 11,100                |
| Total project costs   | 1,500,000                 | 697,300               |

# OUTLOOK

Our key projects and goals for 2021

Five key streams of work aim to attract women and girls to STEM and foster an environment that retains women in STEM and enables them to progress their careers are:

**Future You** 

The Anonymised Review Study

The Evaluation Guide

**Communications & Outreach** 

**Advisory role for Government & Industry** 

#### **Future You**

Future You, a national initiative that raises awareness of STEM careers and provides role models to help kids dream up a future version of themselves in a STEM career was launched in 2020. It aims to create a positive shift in the perception of STEM study and careers being 'for girls' by challenging stereotypes and showing diversity and can be found at

#### womeninstem.org.au/futureyou

The digital content is vibrant and engaging and can be used by teachers in the classroom to talk about STEM careers and link STEM to classroom learning. 2021 will see further development of the campaign and a focus on showcasing STEM careers in areas of growth. Content and communications will be strongly supported by strategic partnerships.

Year in Review 2020

#### The Anonymised Review Study

2020 saw four large Australian research organisations and funding bodies joining us to take part in the Anonymised Review study - Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia's Nuclear Science and Technology Organisation (ANSTO), National Computational Infrastructure (NCI), and Astronomy

In 2021, we will continue to work closely with all four organisations to facilitate and make significant structural changes to their funding scheme as the project is ongoing, with the aim to submit the study for academic publication in 2022.

Australia Limited (AAL).

#### **Communications & Outreach**

The issues facing women in STEM are well-defined and researched. The Ambassador's work has helped shift the conversation around gender equity in STEM to promote action, enable educators and hold STEM organisations accountable to implement effective measures, thereby cultivating systems that support women to stay in STEM careers, addressing obstacles to career advancement, and empowering all girls to pursue STEM study and access opportunities.

In 2021 we will continue to positively engage our audience in conversation about gender equity, inform them of our work and direct them to resources that support solutions to current equity and diversity issues. We are focused on organic, sustainable audience growth with positive, action-based messaging.

## Advisory Role for Government & Industry

In 2021, we will continue in our advisory role to stakeholders across education, industry, research, and government to:

- identify and support existing gender equity activities
- coordinate and collaborate on initiatives
- communicate the case for change to promote gender equity

The Ambassador will continue as a leader and voice for women in STEM at a national and international level, while also encompassing advocacy with tangible influence on decision making and projects which will have a lasting impact on the STEM community by changing systems which disadvantage women in the STEM workforce.

#### The Evaluation Guide

In 2020, the Office of the Women in STEM
Ambassador developed a National Evaluation
Guide for STEM gender equity programs
(the Guide). The Guide delivers on a key
recommendation of the Women in STEM Decadal
Plan. It is also an integral part of the Australian
Government's Advancing Women in STEM 2020
Action Plan.

The Guide is a simple evaluation tool that offers practical advice and breaks down program evaluation into 5 easy steps. It outlines how to create an evaluation plan, put it into action and share the findings. In 2021, a toolkit will be developed to further support the implementation of the guide in gender equity programs.
